Connecting using  
Public IP address | 74.225.207.207

Admin username : vishwa

Port (change) : 22 Check access

Just-in-time policy : Unsupported by plan

## Recommended

Local machine Azure portal

## SSH using Azure CLI

Quickly connect in browser. Supports Microsoft Entra ID authentication. Private key not required.

Public IP address (74.225.207.207)

Select

## Most common

Local machine

## Native SSH

No additional software needed. Private key required for connection. Best for those with existing SSH tools.

Public IP address (74.225.207.207)

Select

## SSH using Azure CLI

Connect from the Azure portal

Connect from your local machine

1 Configure prerequisites for SSH using Azure CLI  
Azure needs to configure some features in order to connect.

## Prerequisites configured

System assigned managed identity  
Azure will configure a system-assigned managed identity and the Microsoft Entra ID login extension. Learn more

Microsoft Entra ID SSH Login Extension  
The Microsoft Entra ID based SSH Login extension allows you to connect to a VM using Microsoft Entra ID instead of SSH password. Learn more

Virtual machine user or administrator login role  
A virtual machine administrator login role is required to login to the virtual machine via CloudShell.

Port 22 access  
Port 22 is accessible on this virtual machine.

Change the port for connecting to this virtual machine. See the page of the virtual machine.

Public IP address 74.225.207.207  
A public IP address is required to connect to this virtual machine.

Connect

Close

**Configure high availability and scalability for your applications**

Create highly-available and scalable applications in minutes by using built-in load balancing for cloud services and virtual machines. Azure Load Balancer supports TCP/UDP-based protocols and protocols used for real-time voice and video messaging applications. [Learn more >](#)

**Balance IPv4 and IPv6 addresses**

Native dual-stack endpoints help meet regulatory requirements and address the fast-growing number of devices in mobile and IoT. [Learn more >](#)

[View frontend IP configuration](#)

[View backend pools](#)

**Build highly reliable applications**

Load Balancer improves application uptime by routing traffic to healthy nodes. [Learn more >](#)

[View health probes](#)

[View load balancing rules](#)

**Secure your networks**

Control network traffic and protect private networks using built-in network address translation (NAT). [Learn more >](#)

[View inbound NAT rules](#)
